## **Abstract of JP2003153164**

**PROBLEM TO BE SOLVED:** To record mass data responding to user's needs while reducing the manufacturing cost of a video recording and reproducing device. **SOLUTION:** A video recording and reproduction system records moving picture data on a user hard disk 15 provided in the video recording and reproducing device 1, and transmits overflowed moving picture data to a database server 3 through a communication network 2 to store the overflowed moving picture data in a contents storing part 4 of the database server 3 when the moving picture

data overflows in the user hard disk 15.
